# The Xaphoon

- The special and really new feature of this instrument is the full and sonorous sound. It is built very simply and compactly and can be carried easily. For a reed instrument, it is small and inexpensive. The Xaphoon is relatively easy to learn and thus an instrument for professionals as well as for beginners.

The Xaphoon harmonizes very well with voice, piano and string instruments.

## Xaphoon Data

- Two octaves
- Chromatic
- Lowest sound C or B $\flat$
- 440 Hz, the „A“
- Overblows in the duodecimo
- Tenor saxophone reed

The original MAUI XAPHOON is produced from bamboo in Hawaii in the United States by its inventor, Brian Wittman.

## Classic Xaphoon

- The CLASSIC XAPHOON is the standard variation. It was developed for schools, bands and everybody that likes something exact. It is made of a plastic, which is also used for the manufacture of clarinet and saxophone mouthpieces. Its sound is somewhat more direct than the MAUI XAPHOON.

The Classic Xaphoon is available in various colors.

The „Limited Edition“
